Drugging Kids: Psychiatry's Wholesale Drugging of Schoolchildren for ADHD

[continue reading](#)

It really makes you question the motives of the multi-billion dollar mental health industry, so when this reserve illustrates, the motives are definitely not pure "health". It's all very simple, and every article documented, and that means you are free to do your very own research as well. Or have you any idea a teen who will take them voluntarily without really being conscious of their devastating unwanted effects? The APA hasn't scientific proof of its existence and never will. There are a lot of places where you will discover the truth in the event that you dig hard more than enough and are ready to wade through tons of articles full of medical terms that no one understands, but "Drugging Kids" lays out the bottom-line facts in simple English and backs them up with technology that even I could understand. I'm betting that if we take this book to our doctors, academic institutions, or judges and give these people the opportunity to support the truth, parents and children will win out each and every time. "Drugging Kids" by C. Garrison clarifies, in very easy language, the existing epidemic of ADHD diagnoses, how it started, how psychiatrists label children with disorders, and how medication manufacturing companies play an insidious role in a child's education. The truth about ADHD medicines in plain English! The writer has done over a decade of research about them, and you may tell from the content articles, medical research papers, and lab testing results that are cited and referenced in the publication and which span from the 70's to today. Perhaps you have or someone you know been forced to put a child on medications such as Ritalin or Adderall due to a diagnosis of so-called ADHD? If knowledge is power, this publication is vital in understanding what's actually heading on in America's school systems, and what is being done to our kids in the name of health. I'd state it's a must-read! Easily one of the most important books in the US today. This may easily be one of the most important books in the US today, and any politician with the slightest interest in serving individuals ought to read it asap. I'd like to thank the author when planning on taking upon this responsibility. If something can be boring, I will not really pay any or small attention to it. Garrison should furthermore be part of the curriculum in the education of all health staff and teachers nationwide. The way in which certain parts of the medical industry is pushing mind-altering drugs with the most horrendous side-effects on our children is nothing lacking a crime against humanity. Eye-opening documentation about what actually goes on when a child is diagnosed with ADHD. This is an eye-opener! ADHD is nothing at all more than an invented disease. I finally found a reserve that we can use to fight. They cause there is no cure of for the reason that there is absolutely no real condition for it in the first place. ADHD and other "conditions" are based on money and lies. Parents should go through this book. Everyone, especially parents, should read this book. It's obvious that his purpose is to quit the needless drugging of our kids, and expose the destruction that is potentially permanent to both their bodies and their irreplaceable youthful minds. Silently causing a lot of bodily harm.... These medications affect the heart, growth and the brain.
