

NEW YORK TIMES BESTSELLING AUTHOR

ROBERT F. KENNEDY, JR., EDITOR

THIMEROSAL

LET THE SCIENCE SPEAK

The Evidence Supporting the Immediate Removal
of Mercury—a Known Neurotoxin—from Vaccines

Preface by **MARK HYMAN, MD**

New York Times bestselling author of *The Blood Sugar Solution* and
founder and medical director of the UltraWellness Center

Introduction by **MARTHA R. HERBERT, PhD, MD**

assistant professor of neurology at Harvard Medical School
and pediatric neuroscientist at Massachusetts General Hospital

Foreword by **U.S. CONGRESSMAN BILL POSEY**

INCLUDES THE ORIGINAL OMITTED CHAPTERS ON THE AUTISM LINK

to eliminate this toxic chemical from the world' However, dangerous levels of Thimerosal continue to be used, posing a substantial threat to open public health and leading to an emergency of faith in vaccine safety. In this groundbreaking publication, Robert F. Kennedy, Jr. need to worry about the devastating ramifications of vaccinating their children., and Dr. Mark Hyman examine the study literature on Thimerosal and make an extremely clear statement about its potentially dangerous effects. also to maintain or boost vaccination rates critical to the United States and developing nations. But despite the many voices calling for action, the media and plan makers have repeatedly didn't adequately address the problem. to move toward safer alternatives; Over ten years ago, carrying out a sharp rise in developmental disorders such as for example autism and ADHD, the mercury-containing preservative Thimerosal was widely believed to have been eliminated from vaccine items in america and abroad.s vaccine supplies; Today, with Thimerosal: Allow Research Speak, the goals are to educate parents, doctors, and health policy makers; Previously, the CDC, FDA, NIH, and AAP, and also the US Congress, the American Academy of Family Physicians, the US Department of Agriculture, the European Medicines Company, and the California Environmental Protection Agency have expressed worries over the use of Thimerosal in vaccines. With safer possibilities, parents shouldn't Kennedy, Jr.

.too bad. Browse this reserve, and you will see the evidence. Five Stars Essential for everyone thinking about the issue, regardless of presuppositions. Putting children's health at risk for corporate revenue and professional and political career improvement is normally beyond despicable, its criminal. Scientists possess always been bought to fight ideas like smoking causes cancers, lead causes brain injury in children, x-rays damage fetuses in pregnant women, DDT, etc. No science at all. Greatest people can do is normally make choices. MSM plays its component in following along since Big Pharma is a big income source.. Researchers in academia can only just study with grants and and gain access to and guess who controls most of the money and usage of health data ? Ensure you get your flu vaccines from single dosage vials (esp infants and pregnant women along with all men who seem more susceptible because of testosterone) to remove most mercury exposure. Aluminium! There is absolutely no place for mercury in them rather than enough is being done to judge their safety overall. CDC and FDA have discredited themselves and Congress (both parties) are beholden to Big Pharma so good good luck on anything changing in the US. Barbaric. The complete system is indeed corrupt concerning remind among the Dark Ages only in this instance its science and big business who stifle the reality and not the church. This may require spending of pocket. I'd most likely eliminate hep B vaccine before child is old to reduce a few of the vaccine load on young children. Please educate yourself on thimerosal with this reserve!! Vaccines kill and destroy lives.. Autoimmune problems are increasing. Add more, ADHD, eczema, asthma, allergies, autism. Consider what thimerosal will do to the body. Just because you imagine thimerosal was removed from vaccines, do you realize what took its place? Vaccines certainly are a positive thing but only safe and sound vaccines.! It's all great. The subject matter deserves more press! It's interesting to me how this part of scientific research will not get the press and attention that the profit-motivated, pro-vaccine side will. We are being manipulated, while millionaires and billionaires range their pockets. It's costing us our health and our lives. Thank God for Robert F Kennedy, Jr. People need to find out this and understand the dangers of . Fake Research This is compiled by a large fraudulent lobby that wants you as well as your kids to die from horrible diseases that can be prevented... I must say i appreciate Robert Kennedy for his work on this subject. Probably the most comprehensive compilation and concise explanation of current research . Regulators require a post retirement job at Big Pharma or result from Big Pharma with plans to return.. The most comprehensive compilation and concise explanation of current research concerning the risks of a compound that should be removed from medical products, particularly vaccinations, immediately. Four Stars Glad to see some one in federal government is thinking. Compelling The science isn't settled as Big Pharma and their partners would like us to believe... Gives science a bad name Please, you should, allow science speak. The research says that thomerosal is normally harmless, because methylmercury and ethylmercury are not the same thing. Dangerous lies This is made up nonsense for paranoid wackos. We laugh at it today yet still support injecting infants and women that are pregnant with mercury for no good reason. The same people making the money, sit down in Congress so of course something needed to be done. People need to find out this and understand the dangers of thimerosal. Very pleased. Not made the decision by people as is the legal method of our country (or any supposed democracy) via jury. Great book. The bottom line with vaccines and vaccination is that relatively recently, the US showed precisely how lawless a nation it has become with the invention of vaccine courtroom. Normal courts were performing a fine job of stopping the risk of vaccination by enough time tested approach to suing them into oblivion.. Look up the current cdc schedule for kids now in comparison to in 1980s...they created vaccine court with

completely illegal standards and burdens of proof way outside our system of laws and torts. Sipping was Great! Instead, a panel of "professionals" simply dismiss claims no matter how much evidence there's. This issue all by itself is reason to not allow vaccination at all. Can't sue the vaccine issuer, no matter how clear it is they are at fault. They have zero motivation of inclination to not put cyanide or worse within their products. This publication is great please read it prior to deciding to vaccinate your child. Don't like it. There is not an ounce of fact in here, all views of individuals who never could move high school level earth science. BEST BOOK on Mercury used by Medicine simply because a "Preservative" (NEVER TESTED) I briefed Bobby Kennedy Jr originally on the scientific fraud in the mercury amalgam and vaccines: He has bravely stood up, as most large law firms may actually have conflicts of curiosity as their clients help to make hundreds of billions on these highly neurotoxic items. Now launching Globe MERCURY PROJECT, he's exposing the callous disregard (another excellent book) of Big Pharma in its greed that understands no bounds. How about no. I wouldn't go to Burger King if that was the standard of liability involved. I certainly won't be injecting some needle drug of no established medical worth, mind you, into my own body or my childrens body.
