NDEs are often hyperreal and lucid experiences dominated by pleasurable feelings and more rarely dominated by distressed emotions." "I saw a shiny light that asked me, in a existence review, what I have done in my existence for love and learning. it was mine." "I felt peace no fear of death." These are words of those who "died" temporarily and reported how they felt when they returned from the "various other side." Because of advances in resuscitation and defibrillation methods in the last decades, folks are returning from the brink of loss of life in amounts unprecedented in human history. Of the millions of people who survive drowning every year, about 20% record a near-death encounter (NDE): a reported memory of profound psychological occasions that contain certain paranormal, transcendental, and mystical features."I could see, floating in the air flow, the lifeguards wanting to resuscitate a lifeless body; This book presents a listing of 40 years of study on NDEs."

–Patriarch/Pope Theodore II of Alexandria "A book well worth reading by all lifeguards of the world. "A wonderful book about those that reached the borderline of death and returned to the land of living. It includes 22 drowning NDE accounts and tips for how water basic safety

professionals may use NDE-related information within their work with people they successfully resuscitate." –Bob Burnside, founder of the United States Lifesaving Association JANICE MINER HOLDEN, Ed.D.D.

STATHIS AVRAMIDIS, Ph., can be a professor of guidance at the University of North Texas, USA, who has researched near-death encounters for over 30 years., is an award-winning authority on water protection at the Hellenic Center for Disease Control & Prevention, Greece.

I applaud the authors for his or her diligence and devotion to getting this subject to light for general public consumption, simply because any accounts of near-death experiences are often looked upon with skepticism, especially by those in the scientific community. Five Stars Its good There's an afterlife and the accounts in this study attest to that Having resided through the experience I found it fascinating to learn the accounts of others who have been through the same thing. This is certainly a well written compilation of true-to lifestyle accounts of drowning incidents. The study published in this publication is fascinating, and insight about the near-death experience as a whole. This book information the stories of people from all walks of life all over the world and the irrefutable evidence and commonalities they all share. Every word that is spoken by 1st responders can (often) be heard by the victim, and may make a confident difference to the individual who is at the threshold of existence, as was true in my case. Five Stars Wonderful book I acquired as an extremely welcome gift! Doubters in a "hereafter" or the existence of an afterlife may remain skeptic after scanning this book, nevertheless, a doubter will most likely remain a skeptic no matter evidence to the contrary. This research can advantage those in the emergency rescue community by providing first-hand knowledge as told from the point of view of these who've been through the near-death encounter.
