CLIMATE CHANGE for the novice

[continue reading](#)

K. CLIMATE Transformation for the novice, is normally a slim reserve that emphasizes the necessity for everyone to be educated about climate change because of its potential to alter life on earth as we today know it. It really is so important to the whole planet that if it's not adequately addressed right now or shortly you or your progeny will end up being impacted by its deleterious outcomes. This necessity is urgent especially among the masses in developing nations where awareness about environment change is limited. The book discusses the global warming effect of greenhouse gases derived from burning up fossil fuels and the heightened vulnerability of developing countries to the undesirable outcomes. The reserve also deals with how the adverse effects of global warming/environment change can be maintained, including the need to change fossil fuels with alternate clean energy resources and the potential impact of such a change when the world moves totally to clean energy. Professor Dike summarizes in this slim book in a concise and readable fashion the relevant information required by way of a novice to understand climate change issues. Therefore, this abridged reserve is a unique and invaluable source for college students and all persons especially in the developing globe who are interested in learning about climate change. THE AUTHOR, Professor Dike N Kalu acquired his early education in Nigeria, received his graduate and postgraduate training in London University, London, U.Climote change may be the most important event that impacts the world in our time. and did his post doctorate research at the Johns Hopkins University School of Medicine, U.S. level by the University of London for his contributions to research, and in 2002 the University of Texas Health Science Center provided him the Professor Emeritus award on his pension. For twenty-six years he taught at the University of Texas health Science Middle, San Antonio, U.S.Sc. In 1998 Kalu was awarded the D.A.A. with his family members and partly in his villa at Abiriba, Abia State, Nigeria.S.A. Professor Dike as he's fondly known, now lives partly in Houston, Texas, U.

I recommend this book specifically for the skeptics or uninformed. It really is explained at a level even Donald Trump could understand. Whether your home is in a "first world or under-developed" country, this applies to YOU. Informative This is a great simple resource on climate change...an excellent start to begin your education on the effects of climate switch we have been now experiencing.
