I highly recommend this resource for parents and practitioners I highly recommend this reference for parents and practitioners! The most highly respected factor for me about it is definitely she lives these concepts and practices these with her personal two children. Sure she's educated and a fantastic clinician but she's a real Mom to children with Autism. It's like having your own personal best friend Mom trainer with you everyday. This book is another champion and I'd suggest to anyone who is studying to become a OT practitioner but also not just a Mother of Autistic children but also a Mom with kids having difficult behaviors. A+++++! TY Cara for continuing to talk about your talent! It certainly, really helped me have an improved knowledge of my children's conditions. I have 1 with autism/SPD and another with ADHD/SPD. This book is another gem by Cara. Follow her blog page/Facebook for helpful tips. The author and OTR is certainly a genius. The Pocket OT. - Marie Bell, MS, OTR/L
