

Practical Mathematics

for Children with an Autism
Spectrum Disorder and Other
Developmental Delays

Jo Adkins and Sue Larkey

Foreword by Tony Attwood

Sue Larkey

Practical Mathematics for Children with an Autism Spectrum Disorder and Other Developmental Delays

[continue reading](#)

The authors emphasise the importance of incorporating a child's special curiosity into learning to be able to help them engage completely with new concepts. Actually the opposite holds true for some, and exposure to fundamental mathematics in the early years can be important in establishing the foundations for understanding later on in life. This is an essential reference for teachers, teaching assistants and parents who want to develop mathematics abilities in children with an autism spectrum disorder and other developmental delays. It is a common misconception that children on the autism spectrum come across mathematics easy. Topics protected include colours, shapes, categories, numerals, sequencing, addition and subtraction and using cash, and the publication includes worksheets and activities for incorporating mathematics into everyday living skills. This publication provides practical strategies and equipment for teaching important mathematics concepts to kids with an autism spectrum disorder and other developmental delays.
