There's No Place Like Hope: A Guide to Beating Cancer in Mind-Sized Bites

That is Vickie Girard's long-awaited and completely indispensable survival guide for cancer patients and their families. Cancer can be a beatable, treatable, survivable disease.S. Through her involvement with the Cancer CENTERS of America and The American Tumor Culture, Vickie Girard has taken her message of "empowered patient treatment" to the floor of the U. Senate and to thousands of cancer individuals and survivors throughout the world. The message is easy, hopeful, powerful, and lengthy overdue: "We should stop speaking of cancers in whispers. We may have cancer, but tumor does not have us. Whatever the type of cancers, here is an immediate, practical, and inspiring guideline that may empower any patient to better battle and survive this disease."

By the way her oncologist simply confirmed all of her cancer is gone! I received a contact from her the evening I offered her the book. I found the message of wish and positivity extremely reassuring. She stated it was just like the writer was speaking right to her. She has since browse the book many times and it has been a great way to obtain motivation during her treatment. Ideal gift I purchased this publication for my Mother who is battling cancer. I think this book would be perfect for anyone going through cancer treatment;! I came across her story of breasts and bone cancer striking but very definately not the norm.. I read it after my surgery and within my radiation treatments. Interesting read. Gives no significant revelations on coping with this awful disease. Not really a ton of brand-new thoughts though.. Whether that came from her hope and attitude or a medical miracle I'll let you decide.All in all nice book, and good story but nothing a lot of people that are looking to beat tumor wouldn't consider on their own. I recommend this book for those who are newly-diagnosed with cancer, she prepares them in regards to what they can expect during and after chemo treatments and how best to cope with it light-heartedly. Once you learn anyone fighting the fight, this is a MUST HAVE! We have purchased it for many people since who however have received similar diagnoses. It's written by a woman who fought the good fight when her chances where slim to none. She is one lucky lady.. Five Stars Such a beautiful and inspiring book that I've given as a gift 2 times! There is absolutely no place like hope and this book was a fantastic start to excersice forward one stage at the same time. We've gifted it multiple situations in fact it is very well received. There's No Place Like Hope What an uplifting publication for all breast cancer survivors! Great story about a very lucky woman.! Though Ms Girard sounded like a PR for CTCA in the 1st few chapters, which almost made me feel like attempting to drop the reserve like a sizzling potato, I admired for power and courage for not giving up and to fight for her lifestyle. She draws from her personal experiences and this is quite encouraging to those who are in the same boat. Great book and resource! luckily I was only identified as having stage I TC, but the fear, anxiety and depression that came with it were genuine and this book truly helped me cope with them. My mind and eye are so greatly loaded by the consequences of chemo that I can't read or focus on anything serious. I love the way the reserve is written and layout - "bite-size" short passages that you can place it down any moment and come back later to keep. CTCA and all tumor centers should get this to an "orientation gift" for all new cancer patients!!We read it from cover to cover within 2 days, and I have to say it's one of the few books and I will read a few more situations. I give this reserve to anyone diagnosed and their family. There are a great number of parts that are difficult to read, there are a lot of parts I can relate with, and there are plenty of parts that bring me back up when I am feeling down... "There is no place like Wish". Thanks Vickie Girard!We am a

stage 3B breast cancer survivor as well and had finished most treatments lately when another tumor survivor handed it if you ask me to read and I love it. Very inspirational for a malignancy patient A beautifully written book. Both of my parents are struggling with cancer, my mom a lot more. This book has taken me so much comfort and ease and hope. Without doubt about any of it.Cancer is true and it seems that every day we here on the subject of more people suffering from it. This is a really incredible book that presents you how actual it is but at the same time gives you hope. Take the time and read this book, you won't regret it. With hope anything is possible I purchased this book after getting diagnosed with testicular tumor. She was so happy with it so far and stated she couldn't put it down.. Five Stars An awesome little book. I have a wonderful support band of friends and family, but there's something extremely uplifting about reading a page about exactly what you're feeling, written by somebody who went through it. We have been blessed! It is usually good for those that like me, do not wish any heavy reading materials during chemo treatments. Great book, I read this probably 10 times when ... Great book, I read this probably 10 occasions when myMom was sick, who has sense passed away. I've since bought 6 of the same publication as encouragment presents to other cancer patients. It's a quick read and uplifting Great Book - love this I have given this book often upon finding a friend is diagnosed with cancer. This is a wonderful book. Amazing Reserve by an incredible Woman This books is wonderful and can help many through trouble. She really was a lovely person and I would suggest this reserve to anyone. Every cancer patient should have this book I bought this publication for my mom after she was diagnosed with stage iv lung tumor. It's been her saving grace. It has given her a light and info no doctor bothered to tell her. Every person who is diagnosed should receive this book that day! Incredible Read! I found that there were times when she hit my emotions and feelings dead on. Many thanks.not only the health side however the insurance side and all the red tape that people have to go through regardless of the emotional and physical toll a cancer diagnosis brings. Husband was presented with this book when he had a cancer diagnosis 24 months ago and it had been a book he discusses yet to this day. The greatest gift you can give someone affected by the "C" word directly or indirectly aside from support.
