The writer, Reno is 11 years old and lives in Florida with his family. Reno was created legally blind and carries many diagnoses including Asperger's but hopes this publication and his story can not only teach you about autism but motivate you to always look at your abilities, NOT your disabilities! He's also a presenter also to date, Reno has reached almost 13,000 people. For days gone by yr he offers been an advocate for autism.

Reno Rocks!! As a dad of a child with autism this book was extremely insightful. Reno not only describes at length what Autism is definitely and what it is not, he provides valuable information not just to kids, but adults too. For the many challenges that Reno faces, he is becoming an inspiration if you ask me for just how he faces those problems. Autism is a social communication disorder, however Reno has the capacity to communicate quite successfully what it means and what it feels as though to possess Asperger Syndrome. I'm so proud of Reno and his accomplishments, but I'm most proud of contacting him and his family members, our friends. This is a book meant for kids and I believe it to become a must browse for siblings, classmates, cousins or any additional child or teenager that knows a kid in the autism spectrum. About the content: this book discusses what autism is, how children with autism may be different and how they're exactly like other children and it offers specific ideas on how best to be a buddy to a kid with autism, how to understand that child and what typical children can do when a child with autism does a thing that may be different or challenging to understand like stimming or having difficulty with having a backwards and forwards conversation. This book helps his cousins know very well what he goes through. I may tell my family that I go through this or this is the best point to do to respond to some items that she does in different ways nonetheless it is not the same as when it comes from a kid that understands what she is going through.! Although she can talk a bit it'll be a long time before she can inform me what she thinks and feels. Like Reno, my grandson was identified as having Asperger's -- I know the book will be helpful and inspirational to my Grandson to check out in Reno's footsteps! Five Stars Excellent book a must go through for everyone!! I have read a lot of books on autism written by doctors, scientists, parents and even adults on the autism spectrum but this reserve has been the only person to provide me a glimpse into how my daughter feels and how she sees the world. I've a preschooler on the autism spectrum.! great publication! But I also consider it a must go through for the adults around a kid with autism. I am getting copies for my daughter's grandparents, teacher and uncles and aunts. My little lady can not inform everyone how hard adjustments are for her or why she has trouble playing with other kids or behaving just how adults anticipate her to. I recommend this publication to everyone and anyone who really wants to understand autism Great Book--great writer! I can not wait until the time that she can inform me how she feels, but until then I will let Reno talk on her behalf. Thank you Reno! I have learned a great deal from your own book and I've already applied a few of your suggestions! Sondra Torres Reno, you did a fantastic job on your own book, I have a 7 year older son diagnosed with autism just one single year ago, I desire I got known about your reserve then. a must read I have an autistic child.! I give your reserve 5 celebrities without hesitation, your in advance approach and clear descriptions have become

VERY helpful! Thank you so quite definitely for writing this very informative book. It could have helped me know very well what was going on in his lovely little world! You are awesome!! great book!! I've seen Reno's demonstration on how to be a friend to somebody with Autism. It helped me recognize how my child's variations make her experience when she is in a interpersonal enviroment and trying to make friends. It has so many good ideas for children in order to understand and become better friends to a child in the autism spectrum.
