and what to do if you drop your home to wildfire. This book is very good. Ms. The publication "The Fire Smart Home Handbook" has more information about how to protect your home from wildfire. Good information about how to document everything you own if the home burns and you need to make an insurance state. The other half is about homeowners insurance, evacuation, and what happens next if your home is destroyed or broken. Both books are well worth reading. This book is very helpful for those who have been affected by wildfire in any way, whether complete or partial property reduction, a close-call, or surviving in a location with high fire potential. Worthwhile! I have browse the reserve, and will continue to use it as a reference as I prepare my family and my home for an emergency. Excellent Resource This book is a great resource for those surviving in WUI to prepare for the risk of wildfire. Very Helpful and Well Worth the Cost. Well written and I recommend it to my clients... She would have been my neighbor, had she stayed in Colorado. neighbors fighting these problems in the wake of the fire. Everyone should read this, also if they don't reside in the woods. It's worth being ready for any disaster. Quick read & Linda's book offers preparedness, hope, and resiliency - and something reader says a huge thank you! Great details and surprisingly interesting! I had not been disappointed. My first copy arrived in the mail last week. Before the night time was out, I had read enough to choose to buy several more copies. It offers vital information on how best to determine fire risk on a house before you purchase; is trying to teach his neighbors about being Firewise. The others were for close friends who dropped their homes in the High Park fire - all are amid some version of the insurance nightmare. Since Linda lost her house in the Crystal fire - a year before the High Recreation area fire - she is much further down the learning curve and her publication is very helpful to those of us who haven't figured everything out yet. This book addresses the spectrum from how exactly to improve your odds of your home surviving a wildfire to how exactly to pick up the pieces if your home is destroyed. Linda's writing balances her personal tale and resilience with accessible information and tasks for anyone who lives in wildfire-potential locations, the Wildland Urban User interface (WUI). Linda's publication gives readers the knowledge to know how to proceed, provide, and save during an evacuation. A highly appreciated book for anyone who has been suffering from wildfire Upon the first few web pages of reading Linda Masterson's reserve, Surviving Wildfire, I was struck by strong feelings left over from Colorado's 2012 High Recreation area Fire. The opening pages filled me with a great sense of empathy, and a connection to Linda's story, as well as to others who have lost homes during wildfires. how to reduce risk through building components, landscaping, and site selection; Linda does an excellent job of putting lots of information in a little book that is readable. Linda's thoughtful, well-researched, and thorough book offers readers the information they need to be prepared before, during, and after a wildfire. essential reading Masterson is a good writer, this is the second of her books that I have go through. This book helps readers to prepare yourself and ready, this means a great deal throughout a fire emergency. I would suggest that anyone living in - or thinking about living in - the WUI should examine this book (and give a duplicate to all or any your neighbors). She also walks readers through the difficult procedure for picking up the pieces after a total or partial reduction, how to approach insurance companies, and understanding the decision-making process of rebuilding or shifting. Important topic As a survivor of the High Park fire - one of the most significant fires in the annals of Colorado - and a 30 yr veteran on the local VFD, I was anxious to see this book because I have so many friends & A Must Read for People Who Live in the Wildland Urban Interface Surviving Wildfire is certainly a must-read for those who are considering moving to the WUI and in addition those who are already living in their fantasy homes in the woods. how and why specific fires become catastrophic; The book is small but

power packed. One of those copies was for my dad who lives in the WUI west of Denver & Linda's terms also instilled me with recognition of the personal choice to reside in the WUI, which includes both great beauty and peace, as well as a great responsibility of living in a nonurban area. This comprehensive publication not only covers you skill to reduce threat of losing your home to wildfire, but also how exactly to recover if disaster strikes. Protect YOUR HOUSE from Wildfire, and Homeowners Insurance in case the worst occurs. Half of the book is about protecting your home from wildfire. Masterson walks you step by step through the insurance maze to make sure you have the best chance of getting everything you paid for. We highly recommend this reserve to Homeowner Associations, Communities, Programmers, and other people who lives or functions in the WUI.
