Lots of information condensed in a beautifully illustrated book. The Amazing Adventures of Oliver Hill is a fabulous inspiring children's book in line with the renowned Napoleon Hill's award-winning Think and Grow Rich. When given the opportunity to look at this publication, I was excited about the whole idea despite the fact that I do not have children of my own. I am an admitted self-improvement publication junkie and I am astonished by the lessons in such short story content. This powerful reading is for children of all ages, simple lessons for adults as well! This principle also got lessons of perseverance, operating together, importance of having a vision, resourcefulness, asking for help, planning for what you need to accomplish, and learning to see things differently, even if it generally does not end as planned.!!! Fantastic!! I truly want I would have been subjected to the success concepts in Napoleon Hill's, Think and Grow Rich, in the way in which Havilah and Diane crafted the principles into stories for kids. Awesome, awesome awesome we can finally teach our kids these fantastic principles. These are lessons more important than half of the things taught in schools today.and beyond!!!! Awesome read! I am long awaiting a book such as this , I knew it would show up ! Great book! Like how meaningful the morals of the stories are for my child. Can't wait to read them again and again as he ages! Highly recommend for children of any age. My nine season old daughter really enjoys it. This book is a must! To help instill self-confidence and personality building in Kids. Overall, good plan to take the classic Think that and Grow Rich and formulate it into a digestible format for the younger generation. A Must Browse for Parents and Children for Discussions on Values and Pleasure within This book is an excellent example of following the ideas it brings forth. What a wonderful way to inspire children with their own untapped abilities to find happiness in life. Purchased this for my grandson, but it has lessons for every ages! Important one for children! Kudos for helping to sow seeds of positive self-worth and greatness in kids from an early age group (or whenever), providing helpful tools to be great citizens and build effective lives. Thank you! Amazing Concept upon Napoleon Hill's Classic 'Think and Grow Rich' First of all, I am familiar with Co-Writer Havilah Malone's altruistic use children. My grandchildren, boys ages 4 and 1, will hear these tales again and again, as this book teaches seventeen valuable principles for positive living today! So here's my take on it. Very short tales that the whole book could possibly be read in a single night!..Once We started reading, We couldn't end and finished all 17 principles in one sitting!! The 4-year-old already enjoys The Amazing Lemonade Stand, story. The tales are very readable and understand. What impressed me most is the brevity, rhyming technique used, signifying and layered lessons (Like Theory #7 - Positive Mental Attitude (Olivia's New Bike).MANY THANKS! Whether you're a reader or not this book is a Must have! Then there's Theory #16 - Budgeting Time and Money (Pay Yourself First) which touches on managing time and money. What a remarkably unbelievable opportunity we and the kids have ! Wow, this was an excellent tale to greatly help lay the groundwork and good practices early. I was inspired by reading the tales and will only imagine the motivation other adults will get when reading the tales to children. The foreword is an ideal introduction to the stories as it emphasizes the significance of reading and its positive effect on children. After reading the tales, there is a brief description of every principle which can be super helpful as children develop into adolescence to young adults. It's as if the book could be a continuous reminder at any age group. And to top it off, there is a book source section that breaks down resources for each of the principles. Valuable Lessons! I'll probably read this over and over again to my six 12 months old. What schools might not

teach you!. Life many challenging and difficult questions are pleased through this beautifully illustrated book ! I've never seen her grab a book on her very own unless I paid her to learn!! :-) A great gift for family members (and YOURSELF)! I recently gifted this lovely book by Diane and Havilah Malone to my 10 year aged niece. She LOVES the illustrations, and the chapters making use of their life lessons for achievement. Buying more books for her entire family so that they as a family -- adults and young ones -- can reinforce these amazing messages so they become of their family values to pass along to their friends and extended family. THANK YOU both! Melissa Koelper This book is completely Amazing! I purchased the reserve for my children who are 18, 7, and 4. My 18 year previous hates to learn and loved reading this to her more youthful brother's!only a priceless gift for all children. Most of us read 3 tales a night together so when a female that's 36 I wish one had come out like this when I was young!)Principal #13 - Learning From Adversity and Defeat (From Ashes to Black Gold) reminded me of a children's version of the mature short story Acres of Diamonds by finding treasure right at home..
