The teachers in this classroom, and specifically the author Marion VanArsdell, navigate the world of autism with a feeling of wonder. Yet by trying to start to see the world through the eyes of her college students and employing a large amount of outside-the-box thinking, Ms. VanArsdell's classroom the term 'autism' was not yet used. The reader involves understand that the techniques are simply just tools, and that it's Ms. VanArsdell's intuition and deep understanding of normal child development and the variations that occur whenever a kid is autistic that make her such a successful teacher. The tales reveal the incredible persistence and need for joy in the accomplishment of small accomplishments that both teachers and parents must cultivate with the realization that these steps do eventually bring amazing progress. The cover photo units the scene;" asks a popular children's reserve. "what do you find in this picture it doesn't belong? I'm buying even more for presents." As I read the stories of the kids who passed through Ms. VanArsdell's classroom, I saw the way the intensive plan she describes gradually enables autistic children to activate and communicate. Reading this book made me hopeful that in following year's image, the boy's hand will become up, and his eyes will be following teacher. A FEELING of Wonder What's so amazing about this book, is that at the core, it is about children on the autism spectrum. Yet it is told with such love and respect and total intrigue into the development of the remarkable kids.Beautifully Written Book of Hope for Parents of Autistic Kids and the Professionals who Teach Them From the haunting cover, Ms. Useful resource to parents and professionals As a clinical psychologist this book was very helpful to me since it was so respectful of real peoples lives and learning variations. Of course the kid on the cover, searching off into the range, "in his own world," will belong, but at least in this second, he is clearly not "present. Great Resource in ASD for Parents and Teachers These heartwarming stories give a window into the myriad challenges that confront young children on the autism spectrum. They illustrate with both humor and poignancy how so much of the way the world works could be really confounding. VanArsdell leads the reader on a poignant journey through individual tales interwoven with short explanations of the variety of methods of teaching of autistic children and how they will have evolved. Hopeful and engaging from the initial page to the last Inspiring stories from an insider's persepctive that provide a reader into the world of kids and their teachers. That is a book for everyone who enjoys good stories, not just for those suffering from autism This is a book for everybody who enjoys good stories, not only for those affected by autism. But this is not a text message on technique, rather, through a series of vignettes about interactions with real children, technique is revealed. Using her innate kindness and problem-solving skills, this teacher allowed the children to help her enter their world in order to work out how to engage them in hers. A remarkable read. VanArsdell demonstrates how she and her team were able to help their young charges transition into mainstream classes - and ultimately, lay the building blocks for future achievement. Heartwarming hopeful, I soaked up these tales. Marion VanArsdell comes with an engaging writing style and a true respect for her students and their parents that's evident in her dedication to her profession. I loved it. I will most certainly reccomend this publication to parents in my clinical practice as a very important resource and support.
