My negative encounters around money have followed me into adulthood but after reading Katie's chapter, I say FORGET ABOUT! So very much, that I completed it in 3 hours Brilliant, heart aching, uplifting and True! This book isn't about one situation or one problem it's about making a direct effect. It brought back my own thoughts of my children' early years that I had forgotten. It produced me mad yet again about the objectives society and then in turn mothers placed on themselves, how lonely and hard it is, and how we are just figuring this out. Nobody is perfect but we are able to all make a confident impact! So so many women will advantage from scanning this - the pleasure and problem and depths to become a mother - and how it doesn't just happen when your kid arrives. I'm thrilled to continue reading this powerful book! This book is to inspire and empower women to create an impact! Thank you, Stacey Friedman! Your chapter, Found, was so inspirational and spoke to my center and my soul as a woman, daughter, wife, mother, sister, friend. Thank you for being raw, honest, hopeful and inspirational! We are so lucky to get from your own sharing. One story that resonated with me was Erin's, "put on your sunglasses" a story of a family that battled medical issues with their children, however, many how in the heavy of it found where to find the positive and live in the moment. I am getting excited about reading even more inspiring women's stories from this collection. Woman Power! Brava! True inspiration Women Who Effect us, is a must read for females. As an elementary teacher and a fresh mom, reading these tales helps keep your head up through existence. "Finding" our true purpose and self is a gift- thanks a lot for sharing your trip. You will end up lucky to read this amazing book! The first chapter I read, "Found", is brilliant - it's heart aching, uplifting, thought provoking, relatable therefore real. And it brought me back to the beauty and tenderness of this age and how quickly I possibly could go from getting madly in love with my children' toes to feeling trapped in my house. SO IMPACTFUL I've only had a chance to read among the stories up to now and can't wait until the weekend so I can dive into every one of them. The one I read by Katie Jefcoat really did leave an impact on me. My money life is going to change. Her tale is about cash mindset and she was among the lucky few who took a poor experience around money and made it into a positive one immediately. I was not that lucky. Appreciate this book We thoroughly enjoyed each story written in this publication. It's amazing how one incident can arranged our mind on something that can change our entire lives. This book is certainly worthy of the read IMHO.
