## New Vision 2050: A Platinum Society (Science for Sustainable Societies)

[continue reading](#)

This book presents the "New Vision 2050," which adds the concept of the "platinum society" to the "Vision 2050". In this publication, the writer presents the "New Vision 2050" in greater detail. What type should sustainable materials and energy try protect the Earth? That is, a "platinum society" that has resource self-sufficiency and resource symbiosis, and where people remain energetic throughout their lives and have an array of choices and opportunities for free participation. Fortunately, the world is on course for the Vision 2050. The "Vision 2050" was established twenty years ago as a model that we should pursue for another half century. The 21st century will be a century in which we look for qualitative richness, with the Vision 2050 because the material basis. Since the author presented the concept of "Eyesight 2050" in 1999, the theory has been launched in two books entitled Vision 2050: Roadmap for a Sustainable Earth (2008) and Beyond the Limits to Growth: New Concepts for Sustainability from Japan (2014). The latter carries a chapter that sheds light on the concept of a "platinum culture". The 20th century was a hundred years in which energy led the development of material civilization, leading to depletion of resources, global warming and climate change.
