I read this in English, and loved it, therefore i bought not only the book, but its synopsis, in Spanish, for something special for my mother-in-law. I read it first and then I purchased this Spanish edition for my mom. I've constantly admired Dalai Lama, he gives an example and plenty of ideas to have a better lifestyle. I purchased this publication for my mom, after reading it myself in English I thought it would be ideal for my mother to read therefore i purchased the Spanish version.! We are so caught up in our each day lives and the rush of getting everything performed and complain about the small things that we never have a step back and think about things such as for example joy and that's what I love about this book. It can help you look at life and situations in life in a different perspective and how to instead of looking for things in a poor way to then turn it into a positive because after all we all have been in this planet together and we just get one life that's so precious and that is what Desmond Tutu and the Dalai Lama try to help us see the good in people and in lifestyle! It is the kind of reserve to have always helpful since it has the answer many of our dayly life complications and questions in a humurous method. I like that besides the Dalai Lama & Unforgettable!! This is one of the most beautiful, wise, inspiring, warm and humane books I've ever read. I believe it is a great book because not only does it give you great insights from two of the most joyous people on this planet, but it additionally makes your brain think in ways I had never thought of things before. Hermoso Es hermoso y maravilloso lo que puedes aprender de este libro.! No quería que terminara. This book is great! I knew little about Bishop Tutu, whom I right now admired just as much as Dalai Lama. I experienced never previously read books that either of the gentlemen have created but after scanning this book I've ventured off to reading a few of their previous work. An enriching reading.! It's the present for the humanity of two different people who've attained the human being fullness by two different ways: east and west. But the book doesn't just show you holy and enlightened people, but real human beings: their sufferings, joys, feelings, and hope. It also has very interesting feedback regarding the scientific study of the subjects involved. Is awesome just how this reserve awake our real human being nature and transfer the compassion, love, and joy of the Dalai Lama and Desmond Tutu. It's like you're there, speaking with them. A must browse!!! Will never be disappointed! Great great ready! Bishop interactions the author includes study about the topics becoming discussed in the publication. Lovely gift.Great Book! She hasn't stated anything about it yet. Five Stars Book arrived in a timely way and I've enjoyed reading it. A very good read.
