The thing that is perfectly obvious is that despite the panic, sense of helplessness and getting overwhelmed initially, managing this chronic condition does become less difficult. This is my 4th season helping my child manage his T1D and examining blood sugars multiples occasions a day and taking insulin is as automated as brushing your teeth. The author also offers a great showcase of resources that any mother or father or caregiver will worth. Resources include information regarding books, websites for advocating, support groups, school resources (504 programs), travel information specifically for airline travel, snack ideas, carb counts and an exceptionally valuable carb elements of common foods and much more..
