Parasites: Lice, Ticks & Fleas

[continue reading](#)

Head lice have already been documented as soon as 8,000 B.C. Presently, in the USA there's 6 to 12 million reported cases of head lice--it's no wonder some of our common language comes from these long-time parasites such as for example nit-selecting, nitwit, and reviewing something with a fine-tooth comb. Archeologists discovered a nit (lice egg) on the hair of a 10,000-year previous mummy in South America. And keep in mind when "rest tight and don't allow bed bugs bite".. was only a cute small bedtime phrase. That assumes a complete different meaning when you study from this eBook, that there is a 600% resurgence of bed bugs in places you'll least suspect. like 5-star hotels. In this eBook we will answer queries on lice, ticks, and fleas, and additional creepy-crawly insects; in addition to offering some suggestions on how to rid yourself of a few of these pesky, blood-sucking parasites.
