A must-have for raising vegetarian/vegan children A wonderful picture publication for vegan children. It conveys the message that pets, in this instance our chicken friends, aren't food using age group appropriate language and images. The alien Dave as the main character adds a humorous contact and my kids (age groups 5 and 3) appreciate flipping through the web pages on a daily basis. This is an excellent & triggered my daughter's creativity! It's a little weird and gross, however the illustrations have a sweetness about them.. Overall, superb children's book, perfect for age 2 & Wonderful Simple, fun, easy to follow children's book. Five Stars Good vegan book Four Stars It was cute and my boy loved it.. If they sleep, chickens often dream – we realize this because they experience rapid eye movement (REM) sleep... Adorable and fun to learn This book is adorable. simple story that emphasizes the importance of chickens rather than eating meat. My nephew(8) asked to read it and I allow him, that night time his mom went to cook him chicken and he asked for a meatless dish instead. So it definitely appeals to children.. Provide a Cluck about Chickens! Chickens are sort of awesome. They can distinguish between more than one hundred faces (poultry faces, that's! She was super pleased to discover that Dave, while only a storybook personality, doesn't eat meat either! They appreciate sunbathing – and dirt bathing! Great individuals that will get your children's attention. A mother hen will bravely defend her chicks from predators; using "chicken" as a synonym for "cowardly" doesn't quite fit. Chickens can travel up to nine miles an hour and, you should definitely slaughtered for their meat or caged for his or her eggs, hens can live from five to eleven years in the wild. (Okay, so probably I put a few factoids in his mouth area in order to add spice to this review, but you get the gist! Just listen to Dave, the three-eyed, double-horned, snaggle-toothed, lumpy blue alien. But don't take my phrase for this.) He's pretty wise, you know; he'd need to be, to master space travel and all. And this 35-year-old liked the artwork and enthusiastic message, too. All pets are pretty great and have the right to become free – hens included! Connects good with vegetarians and chicken owners! The message is usually presented in a fun, engaging, and gentle way, stressing the initial attributes of chickens instead of, say, explaining the horrors endured by electric battery hens in egg-laying facilities. My 5-year-old boy cherished it and is very impressed that hens are distantly related to T-Rex! The photos are entertaining as well, with one being truly a chicken flexing his muscle tissue and another wearing an "anti-chicken meat" shirt!
