Highly recommended for young ladies! I myself was disappointed- I missed anything in this book that I didn't know. Maybe I had a need to read the description a bit better, however when I saw "MAKE UP" in the title, I assumed this might be the majority of the content in the book. Also time I viewed the publication before wrapping it to give it to my pal, I was a wee bit envious..

Beautifully done! Really small makeup section Very small section about makeup and just basics.' What female doesn't know that? I think her message to women and women is super positive and find her to be a beautiful and . Again, younger females may value this, but this was details that I don't need. Therefore for me, this was a waste of cash. Great life information for teens and adults alike!. She's the first beauty guru I've ever watched and I'm so glad to see her success as she did. She even recommended my friend's sister to read through it. Michelle offers advice from social lifestyle to using the computer, beauty, and career. In the first area of the book, she includes a bit of her history/biography. In the event that you haven't tested Michelle Phan's youtube channel, you're really missing out. She provides a lot of honest life guidance not only is it a beauty guru. I also was not a fan of the way that she had all these rules on make-up and how to live your life. The book is also extremely nicely designed, with colored pages and quality material for every page. But there's info on how to dress, how to move prepare for a job interview.. Four Stars No significant eye make up, her life story is really inspiring, sincere advice Great book for beginner/moderate level enthusiast This book is written for beginner-moderate level constitute enthusiasts but it doesn't mean it's not great. It's pretty and well thought out and put together. Admittedly, my teenage daughters are more fascinated by the content of this publication than I am.? If you're a fan of Michelle or searching for some ideas in make-up, independent entrepreneurship and a few encouragement to get right up and stick to your dreams, Michelle manages to do that within the webpages of an extremely nicely bound book. Bought 2 copies for my best friends' senior high school graduation and I'm right now considering buying one for myself. Slut Shaming?so investing in a copy for myself is soon! It's certainly no "Kevin-Aucoin-esque" advanced make-up technique guide --- but again, it doesn't claim to be. Michelle Phan as a human being is a massive contribution to the people and this book gives you a well-rounded appear at who she is as a person and what she represents. General, I believe her message to women and girls is super positive and discover her to be a beautiful and authentic person who just oozes with like and light. I would definitely gift this publication to the younger females in my entire life! xo really good read this book is very inspirational it is an excellent read and enables you to feel good and is empowering but you will get very good makeup advice clear of youtube that is much more in depth than this book but having said that I highly recommend reading it. I'm 23, wouldn't contact myself a complete beginner but I'm not at all great yet. I love Michelle Phan. Among my friend's mom actually flipped through the publication and really loved my present. She's fine at teaching others at how to look and take action fancy without stop becoming who we have been. This is a must read for the girly female, professional makeup artists, and beginners. A Good Gift Idea Make-up and personal care tips and help, personal stats of how she got where she is and turned a hobby of something she loved right into a business and some tips for work interviews, resumes, etiquette things such as that. I'd recommend this publication to young teens who are really into make-up.. I really like Michelle Phan, We watch her videos from the very beginning when she was utilizing a crappy camera. She does touch on the fact that as much fun as make-up it's real confidence and personality that makes the make-up pop. All in all a good read, a good gift idea but pretty generic stuff. Amazing book. I always be thankful when books like this also delve into holding onto you're integrity and popularity. I was able to grow with her and see how make up changed her life. Not cool. I love it. Very, extremely

basic stuff. Michelle has done a fantastic job with her publication! I liked it to pieces and it makes a lovely addition to my bookshelf.. I love how it was organized and the information was both interesting and brand-new/familiar in some sections. There's even a line from the reserve that says something similar to, 'The barrel of the curling iron may be the part that heats up and curls the locks. Might be an excellent book for a high schooler no adult. Expert Make-up advice This book is full with information I can use and I am a grown women.. I honestly like Michelle Phan's writing style in this- short, lovely and to the stage. it's one of the best books I've read in ten years Exceptional etiquette and protocol book. This book goes over everything starting from the bottom up. Of training course I understand how to put on blush, mascara, etc but she gives great guidelines that I hardly ever knew. For instance, she mentions conditioning your eyelashes with petrolium jelly. Super helpful random suggestion that I didn't even know could help my day to day routine. It's a great, helpful publication and I would suggest it.it appears this book is best suited for the 15-21 year olds As another reviewer described, it seems this book is best suited for the 15-21 year olds. My girl loves the book! I adore this woman so in all honesty, We would've purchased this reserve no matter the evaluations! I learned how to put on constitute from her and her publication is beautiful and thoughtful to the reader. This book is pretty much all of the advice Michelle would share with someone if she had a couple of hours to sit back with them. However, the publication is cishnormative and discusses slut-shaming, which is so not great. She is also an entrepreneur and has her own beauty brand. I believe makeup especially should be about experimentation, so I had not been a fan overall.
