I've purchased this book 3 x now. A copy went to my son's SPED instructor in Elementary school and now a duplicate to his high school social employee. Great social tales, friend ideas, emotions identifier, description of body development, and lots of other details for all children not only down syndrome children. I'm a psychologist currently working with kids and adults with Down Syndrome and additional intellectual disabilities, and We was looking for general information regarding sexuality because this is one of the most common concerns for parents, teachers and caretakers. This publication is great, not only it includes general information, but ideas, strategies and drawings about everything a mother or father or caretaker should know (teaching adequate behaviors, menstruation, masturbation, relationships, etc.). And I really like the thought of "parental pauses", a moment for parents to issue themselves in what they think/feel about a certain subject Prior to trying to teach it to the child, to allow them to share the information more effectively.
