Serves as an excellent foundation platform for teaching important thinking Joel knocked it from the park on this one! As a clinician (LSW) who works with ASD youth, one of the greatest issues is helping them conceptualize that it is not all about them, their wants, needs, interests and desires. There exists a peculiarity within their brains that it seems simply doesn't connect like us so-called typically developed human beings. Takes complex concepts and applies them for actually my even more significant learners to comprehend. This reserve has three stuff that work very well: 1 - Its really attractive/compelling, the pictures certainly are a HIT. 2 - The teaching is definitely graphical and basic, they get it w/o a lot of talk talk talk-ing. 3 - And its conceived in a fashion that they simply GET, it complements the way these kids procedure and think. Joel has learned his stuff. I take advantage of this book over and over. Makes small talk and finding common passions with people concrete and clear to see. Autism Spectrum Disorder Super effective way to instruct students with ASD about conversations and being interested in someone else's interests..? ---- also I highly recommend Joel's book "Our Brains Are Like Computer systems!" Now that says everything whenever using this population!" I use it all enough time." moments. Great Resource for Sociable Communication Intervention I really like Joel's creative method of wearing down abstract concepts into more concrete, understandable equipment. I wish we're able to get access to digital copies. If I could only have one sociable skills book for a youngster on the spectrum, this would be it. Absolutely well worth its higher price. Pairs perfectly with The Conversation Train, another publication by Shaul. Exciting for kids both on rather than on the spectrum, making it a great choice for reading in a mixed group.
