No Padding, Just Clear and Practical Tips Researchers at Chicago's Northwestern University recently proved on film that a bright flash of light explodes when a sperm meets an egg. (Do a web search for "flash of light at conception" and the evidence will come up. I've not been capable to read it to complete yet. I found out about Tindall's information to aura reading the day after studying the Northwestern research, and the timing seemed, well, timely. Now that it is in Kindle file format, I've it on my kindle and on my Ipad. I highly recommend any of Tindall's books as being worthwhile reads. It is a no-nonsense streamlined guide for those wanting to find out about auras and how exactly to read them, to a refresher for those who need a quick brushing up. The author's approach is easy and direct, there is none of the filler and fluff that you come across in other books on the topic to expand the web page count. This instruction is probable the clearest debate of auras that I've encountered. I'm going to be recommending The Aura Reading Handbook to my students As a metaphysical practitioner, I am always searching for concise, accurate and clear to see resources for my learners. Loren Tindall's The Aura Reading Handbook is merely that and I can say it'll be recommended reading within my Psychic Encounter (tm) workshops. Tindall has reduced a complicated topic into a book that the beginner can easily grasp and the experienced can review quickly. The full color drawings make it easy to match the main element aura vibration colors with there universally accepted meanings and the text is easily comprehended by the novice. Glad IT REALLY IS On Kindle Now I've had this book for a long time in another format, it is my go-to reserve for refreshing my storage on all things related to auras. The contents is well laid out and is very easy to understand I've just started to add the study of auras to the set of meaning-of-existence books I've been studying the years. What a creative method of the old art of aura readings. "With this introduction to auras, Personally i think, I've finally had the opportunity to make the connection of how they fit into the overall scheme of energy, existence and the other part. The contents can be well organized and is very clear to see. Thank you Loren. Real eye opener Very well laid out, includes an excellent short history of aura reading, great color meanings, some basic info on chakras, too. Interesting read. You need to definitely buy this reserve, whether you are a specialist, or just getting started, or simply curious. our requesting your subconscious brain; With Loren's gem of a book, I feel I could today speak confidently about auras and additional empower my customers. I am a professional tarot reader, and frequently get asked about psychic intuition, astrology and people's auras. Simple, easy to digest, but filled with interesting, and unforeseen information. I've usually poo- poo'ed auras as a thing that seemed "as well out generally there" for me, but obviously - "The time for this teacher has arrive". Definitely recommend it Informative and Interesting Although I can't say that I've read all the books right now there are to read upon this particular subject, I have read a few and this was, for me, the most comprehensive and well-rounded. I use uncommon angles such as for example astrology, chakra's, aura's..From the Old Country, Nico Thelman Five Stars Received quickly without issues.This isn't my first book I've read on this matter, but I have to say that even on my first read, there are a few new elements that I can use in my own Storytelling i. Great for people with very little knowledge. It's thorough however simple, with easy to follow exercises. A wonderful source for the psychic reader This book, just like a good meal, leaves you full. ...What a creative approach to the old art of aura readings..) As philosophies such as for example Gnosticism have purported for a long time, we appear to be beings of light. Really easy to check out! Love this book!e. Super easy to learn and adhere to. I also enjoy the exercises included! You won't be disappointed! Great book I really like this book since it breaks down all of the colors of the Auras. Best aura reading handbook! This book was the

best aura reading book I've found. the use of the pendulum or numerology in link with aura readings; Looking towards reading her other publication now.! It also tells what each color mesns Loved it This book helped me further my understanding of aura reading. I've also learned new methods to meditate and it's easy too! I'm a metaphysical storyteller in Europe. The print is so tiny however the book is packed with great information. A good structure and tips and exercises on what you can train you to ultimately see and read auras - even if you have never performed it before. The print is so tiny however the book is packed with great information.
