PANS, CANS, and Automobiles: A Comprehensive Reference Guide for Helping Students with PANDAS and PANS

continue reading

The alarming outward indications of Pediatric Acute-onset Neuropsychiatric Syndrome - sudden tics, OCD, and regressions in both learning ability and behavior - can leave families stunned. Furthermore, when educators and mental medical researchers attempt to provide those households with desperately needed help, those providers may soon discover that tools ideal for addressing those symptoms in the overall people are ineffective for the youth who is battling PANS.In this seminal work on PANS-related education, learning specialist, educator, and researcher Dr. Candelaria Greene PhD provides voice to the struggle that those amazing young people and families encounter. She offers a practical road map to assist those students through their unique academic challenges. In addition to holding teaching credentials in Regular and Particular Education (Preschool through Adult), she actually is a Board Qualified Educational Therapist, in addition to a Certificated Learning Specialist for the California Community University System. Those symptoms need that providers appear beyond a one-size-fits-all approach when treating the PANS-affected child or young adult. She then reviews the processes and issues of obtaining unique education, accommodations, and other essential services, plus a detailed overview of the ways in which laws in the usa support those important interventions for college students with PANS-related symptoms. Candelaria Greene provides continuums of educational support which are exclusive to each student's conditions. Candelaria Greene provides an in-depth historical overview of PANS, followed by a dialogue of how this multifaceted condition thwarts college students' abilities both outside and inside of the classroom. Her are a instructor and professor of Special Education provides spanned over thirty years and three continents. The phoning cards of PANS is among jagged dysfunction in multiple areas - along with healing and recovered function over time. Moreover, she provides 'signposts' to greatly help the practitioner and parent determine those educational and particular educational practices that'll be most effective in the educational treatment of students with PANS. Finally, the book provides practical equipment for providers and family members alike through appendices that include a PANS list of guidelines, glossary, references, web assets, descriptors of OCD and tic disorders, and sample letters to initiate educational providers. Jamie Candelaria Greene PhD has served college students with special needs from all ages and developmental levels. Appropriately, Dr. Dr. Candelaria Greene's analysis and writing has concentrated attention on effective educational practices, literacy, vocabulary acquisition, and specifically, the effects of health issues and the environment on learning capability. Sprinkled with humor and poignant tones, Dr. In her private practice, Dr. an evolving and passionate inquiry ignited by her very own child's trip with the illness. Furthermore to her medical practice, Dr. Keywords: PANDAS, PANS, Autoimmune, Disorder, Behavior, Sensory, OCD, Tics, Accommodations, Education Candelaria Greene has provided educational assessments, academic support for adults re-entering education and readiness abilities for children at risk. Candelaria Greene recently completed a two calendar year tenure as a Visiting Scholar Researcher at the University of California, Berkeley, where she investigated the consequences of PANS on learning;

Comprehensive and very helpful! This long-awaited book will not disappoint! This publication so far appears to have some practical observations and suggestions.. I am a also school-centered occupational therapist and I can see the worth in this reserve from that standpoint as well. Among the key things I wanted was an explanation of the mind structures, system of the disorder, and reasoning behind the symptoms. The author explains it in a concise and easy-to-understand manner. This book actually delivers. I am so grateful that of this information can be found in one place. This publication is direct with beneficial examples and This long-awaited book does not disappoint! Great book for a returning student Just returned to school after three years. Five Stars about half way through and loving it My 10-year-old daughter was diagnosed lately with PANDAS and Lyme Disease after nearly a year of fighting odd symptoms and some health problems and hospitalizations. Have just had it 24 hours but so far appears to be comprehensive and what we need. JUST WOW what a wonderful comprehensive overview JUST WOW what a wonderful comprehensive overview! Although it is created for the lay person, the extensive information may also be of great advantage to academics and health care professionals. When you have a kid with PANDAS or PANS OR are an educator that is a MUST READ. 1 in 200 kids possess PANDAS or PANS- it is important that educators know about these illnesses and how they influence children in the classroom. Great resource for parents Great resource for parents, mental medical researchers, school personnel, and doctors!This book stands out from the others with it's thorough description of symptoms within children with PANDAS beyond the diagnostic criteria. Great information for educational planning. Excellent, useful Excellent, useful, accurate content which is well organized, well researched and cited. I bought 2 of these do I could distriibute one to my son's college. I am recommending this reserve to my family, the institution staff and my daughter's pediatrician. It provides very practical and useful approaches for ... Comprehensive and very helpful! It provides very practical and useful approaches for parents and educators. I really like the HIGHLY practical tips. A useful tool to share with educators especially intended for USA. I have done so much study and have asked so many questions of various other parents through online forums but I needed more-- when you are a parent in this example you feel as if you can never get enough information.. This book has already given us some great suggestions once we prepare to navigate another academic year while coping with the pandemonium of PANDAS. A useful tool to share with educators especially intended for USA in relation to govt guidelines towards teaching kids with higher needs. Highly recommend. Needed suggestions to become proactive and see achievement.
