Because being scared stinks! Veronica learns, though, that when you try to repair an issue on your own, you may make things a little bit even worse. She knows that recess is the greatest part of the time. An Imprint Bookt play during recess because she's as well afraid of bugs, that's an enormous problem!s problem and every problem!Seven-year-old Veronica Conti knows a thing or two. Or possibly a lot even worse.The first adventure in The Fix-It Friends chapter book series anchors humor with plenty of heart, as the group learns to deal with fears and phobias.bugging out,” Veronica forms a group with her best friend Cora, total tech whiz Ezra, and Mr. Know-It-All—Includes a toolbox of professional advice on how to face your fears! Together, they are able to tackle Maya’ Problems have to be fixed. Jointly, they are the Fix-It Friends!So before you can express “her bossy big brother, Jude. And if somebody, like Maya, doesn’

Funny, witty and genuine - This series is a wonderful ready for younger elementary crowd. My 7year old would not place these books down. Veronica "Ronny" and her close friends share all the ups and downs of your everyday 2nd grader: feeling overlooked, feeling shy, reduction, being afraid, getting teased, having difficulty reading, getting arranged, ... Funny, witty and true, this series experienced him returning for more reserve after book! The heroes are vibrant and easy to relate as well. We can't await another one. But unlike additional "helping" books Fix-It Friends reads like only a great story. And my two yr old enjoying following along as well! Fun reading together as well. Scenes from the tale have quickly become part of family conversations about overcoming fears, being good to your sibling, etc. Engaging and fun! THE MAIN and her child (a Fix-It Friend) are Jamaican.. They had some common bickering but when push came to shove they helped and looked after each other. Incredible fresh series- my 7-year old LOVES!"Truly.. She loves it. she has read this book at least five times.. From my seven year old daughter: "I really like The Fix-It Friends since it has full discripchins (descriptions) of the caricters (characters) and it can help you solve your probloms (problems). My 7 year older just read both these books by Nicole Kear and LOVED them. As soon as she finished the next one she asked once the following one in the series would be coming out. Another aspect of the books that I loved was the partnership between one main personality and her brother. Kear can compose quickly to appease her developing group of fans! Congrats on these fabulous books Perfect for 5-8 calendar year olds! An incredible concept executed with good humor, zest and heart. Veronica's voice in particular is sharp without being annoying, funny without having to be mean, and utterly infectious. For example, in HAVEN' T ANY Fear kids figure out how to talk back again to their worry and to take baby steps to conquer fears. The advice that the youngsters reveal is clearly developed from evidence-based best practices for working through these issues I simply finished reading this book and the second one, Sticks and Stones. These beginner chapter books inform the story of several four close friends (a brother-sister duo and two of their buddies) who help children with big complications. I can't wait to learn more in this series! The Fix-It Close friends books are chockfull of solid advice for kids and parents on how to solve real problems. The heroes are fully created with interesting backstories. An enormous cheer for the Fix-It Friends! One personality has Italian grandparents, a dad who's a super in an house building and a mother who is a therapist (a great way to obtain professional insight). The books also provide parents with extra assets and a website with a lot more information. The characters are vibrant and easy to relate too My five year older loves this book! The suggestions that the youngsters reveal is actually developed from evidence-based best practices for operating through these issues. In Sticks and Stones the close friends advise children being teased to keep a poker face, walk away and ask a grown up for help. So fun! "I really like The Fix-It Friends since it has full discripchins (descriptions) . Another friend is Spanish-speaking. I hope Ms.. That's how siblings should be portrayed in kids' books. Generally referencing a pesky brother or a despised sister doesn't help genuine kids navigate sibling relationships. As a mother or father of a worrier so when a family trainer I cannot recommend these books more highly to young visitors. These Individuals are So Fun! Also, the personas are from very diverse groups. Your kids will love Veronica telling her tale. You will like the encouragement your children will receive to face their fears. The initial book covers a rigorous fear of spiders while the second installment handles bullying.
