

# NATURAL STRATEGIES FOR CANCER PATIENTS

- Minimize the side effects of chemotherapy and radiation
- Increase the benefits of your treatment program
  - Fortify your immune system
  - Maintain strength and vitality

RUSSELL L. BLAYLOCK, M.D.

Russell L. Blaylock

## Natural Strategies for Cancer Patients

[continue reading](#)

This book displays how easy it can be to fortify nutritional status in this critical period. Blaylock - a respected doctor and clinical assistant professor of neurosurgery - has developed an easy-to-follow program to fight naturally. Tumor and current cancer treatments wage war on your body, but Russell L.

Because of her progress my wife's radiologist calls her his "poster kid" My partner has been battling malignancy for 5 years, the past 2.5 years, stage IV breast cancer. In November of 2013, she awoke with a terrible headache which ended up being caused by overlapping tumors throughout her human brain. He also says incorrectly that lemons, will acidify your blood, they are an alkalizing agent. At some time you realize that your oncologist isn't treating cancer, but is handling the symptoms. Blaylock's publication, where we also discovered our list of refreshing produce to use to make the juice/smoothie. Another brain scan exposed the tumors were significantly diminished and my wife's headaches were almost nonexistent. This book may be the first place I'd begin. a source of vicious misinformation. To boost glutathione levels, we ingest raw, break up garlic, consider NAC, and several other supplements suggested in this book. There are numerous, well described therapies throughout. Dr. Great Publication but missing key points We give this five celebrities, but it has some short comings. Therefore the amount of Supplement D3 he prescribes is quite low.. This book is the perfect companion for anybody facing cancer treatment who is looking for support in a functional medicine mode. Because of her improvement my wife's radiologist phone calls her his "poster kid". This book was absolutely amazing! However my sister won't change her diet plan, but at least I've the information and might be able to help another person later on. I was already very acquainted with Dr. His remedies for herbs aka Materia Medica is pretty rudimentary and I would recommend William Cho's books by Springer Verlag on Materia Medica and consulting with an ND or Chiropractor on an evidenced based herbal system.! He's a board-accredited neurosurgeon, who during writing this book had treated cancer sufferers for 30 years. His advice and information was simply amazing.. He gives specific information about which form of vitamin is most beneficial and what the dose should be. He tells you the best way to prepare vegetables therefore much more. He clarifies which things ought to be started before treatment begins, if that is feasible. He's a board-certified neurosurgeon I purchased this after my sister was diagnosed with breast cancer.. And I have a fourth to give to someone later on that might need it. But when I read the name "Blaylock" that was it for me. Personally i think like God pointed me right to it when I possibly could have gone forward and bought a different book. You will not be sorry for selecting this reserve. No vomiting, not even tired. A wealth of nutritional knowledge to fight cancer. This is my go-to reference book for all things natural that help in the fight against cancer. Dr. Blaylocks doses rates are far too low, imo.D.. I don't have cancer but my wife does (Stage IIIC Colorectal). We also started taking supplements suggested in Dr. After that, like us, you will hopefully venture out and do your own research to learn how to actually treat cancers. She could stop acquiring steroids for the swelling. Blaylock explains why it's important to protect your good cells, not merely from tumor, but from what may be worse. For reasons unknown, Blaylock ignores the substantial proof that high dosages of Vitamin C in IV form has been shown to become a very effective treatment for cancer. Still he gets therefore much 'right' if you're only going to recommend one reserve to a cancer individual this should be it, as its most current. Cancer individuals should get 2x weekly IV vitamin C shots or take liposomal supplement C, 10 grams a day, daily. Find Hoffer/Linus Paulings book, 'Healing Cancer' where they provide a statistically proven vitamin/supplement program that will increase survival time 500 %. Blaylock should be ashamed for missing this epic study since it was done by a 2X Nobel Prize Winner. I also highly suggest readers understand the science behind Blaylocks recommendation by reading Orthomolecular Medicine for Everyone by Dr. Abram Hoffer. Hoffer gives many, many organic treatment programs for diseases, including one for cancers in his publication. Blaylock needs to badly rewrite this publication on Vitamin C dosages and forms! Primarily, it has arrive to my attention that Blaylock has made an appearance in a RW conspiracy-theorist Alex Jones You Tube video. This is a significant fail, imo, in light of recent and past scientific evidence. Blaylock may have been influenced by the Mayo Treatment centers highly rigged study on Supplement C which Dr.. He also does not unearth the truth that 50k IU a time of Supplement D3 was found in the 1920 to take care of cancer until the patent was more than turned.. Discover Jeff Bowles latest book on Vitamin D3 in high

dosages. Also recently high doses of Vitamin B1, within an oil soluble form is being used to treat cancers in Japan and other degenerative diseases, around 1-2 grams per day. Blaylock will not proselytize, he basically states the scientific details of what has been shown to be helpful - or detrimental - based on scientific analysis and his own encounters as an M.D. She started whole head radiation from the doctor and whole, natural, fruit and veggie juice/smoothies from me (with the help of a 2 hp Vitamix blender). Blaylock and I believe he's directly on target with his tips. Also he leaves out such potent anticancer herbs simply because Neem Leaf (today being made into a patented drug for cancer), Cannabis Oil (today in phase one trials in the United Kingdom for brain cancer, in a patented, synthetic form), and Sodium Dichloroacetate, a close to 'cure most' miracle treatment available in Canada, through Medco, Toronto and the highly effective German Hyperthermia treatments. However the AMA would pull his license I suppose if he discussed those natural remedies for cancer that aren't toxic and carcinogenic like rad/chemo is usually. The dose prices he prescribes are much too low and in the wrong form. It's a shame that Blaylock does not promote Orthomolecular Medicine to his readers. Chemo, Radiation? I am a student of Blaylock's. I've browsed 3 of his books and obtained his newsletter. He goes into detail about minerals and vitamins, chemo, radiation, and surgery. I trust this guy and also have already bought many copies as gifts for two nurse practitioners that I understand and what he says holds true. I gave this book to friends who adopted the recommendations in this review CLOSELY. They felt good completely chemo and radiation!! Your physician may tell you that nutrition is not important. This book was totally amazing! I hope you will end up as happy with it as I am! Hoffer did most of his ground breaking focus on nutrition, high doses of vitamins/minerals/amino acids and cancers during the 1950s and 1960s and 1970s. (There are several recent studies that display that B supplements are not good for men. In fact they didn't miss a day time of work (except treatment times) !!!! Read this!! but keep in mind he's not the main one puking his guts out. Cancer tumor can be inconvenient and it takes work and time and energy to heal.... This book works together with those who are taking a chemo and the ones you cannot consider chemo drugs for malignancy. Drink the veggies, consider the supplements and feel great! Never give up Easy to comprehend. Alex Jones is an extremist & A great book for our times Just what a wonderful book. I have a copy, bought one for a friend and informed my sister to get the book. You need to keep your disease fighting capability strong.. Five Stars STILL READING BOOK Healing power Ok Great book Very well written book, I am finding such great information in it. Required reading.... The book is filled with great food and supplement suggestions to help with everything from chemotherapy and radiation unwanted effects to slowing down and halting the development and spread of tumor. Help yourself.. So informative., the radiation and chemo cancer treatments. Highly recommended reading for ALL since cancer is affecting our entire population. Five Stars lots of good information great to have if you know any one who's fighting cancer Natural Approaches for Cancer This book was published in 2003 & requirements updated... Linus Pauling debunked that selenium should only be gotten through foods rather than supplements)! There is hope, never quit! We think the Boswellia/curcumin supplement, coupled with extra virgin olive oil, took the area of the steroid. Blaylock's association with Alex Jones will not speak well of his credibility or integrity as a physician.
