Highly recommended Anyone dealing with the "sunset years" should read this publication. We are treated to a wealthy tapestry of characters as Tennie reflects on her life experiences. A good read - this book can make you re-examine your ideas about ageing! This might make a fantastic book club choice. An excellent read! A terrific go through! The author's warmth of sense comes through and the story could well be of particular interest to those in their mid years if faced with the sometimes hard decisions that might need to be made concerning older members within their families. Tennie's Space This special book is so timely with the state of our lifestyles and the ageing population. Didn't want to finish this great read Unquestionably loved 'Tennie's Space' and didn't want to buy to end. As we get older it's nice to read of others facing similar circumstances, some funny, and some not funny. How wonderful to have a friend like Tennie. Her personas are well portrayed. Ross explores the loneliness of the elderly installed in senior care facilities and the way the western culture handles housing of the elderly and the resulting deep sorrow. Irrespective of their experiences and circumstances, dignity and respect are often denied to the old generation particularly when their independence in Treatment homes is extracted from them. Through the observations and musings of the irrepressible Tennie, the author draws the reader towards a greater awareness that within the heart and mind of even the grumpiest and uncommunicative old citizen, resides a distinctive individual desperate for continuing love and acknowledgment of who they're. A timely reminder for all involved with caring for or planning for, the care needs of an ageing friend or relative. An absorbing examine with an intriguing twist at the end. The individuals the author describes are no invention. I will miss this friend posting her secrets, observations and musings. A great addition to my growing library that I plan to tell the rest of the family. This book ought to be a "must read" for every kind of aging parents. The author weaves lighter notes and serious contemplation together skilfully, permitting Tennie's Space to cope with difficult issues yet remain a straightforward and interesting read. I thought the finish of the book was clever and poignant. I think Tennie's space, and also being an interesting conversation of the problems of later existence, independence and treatment etc can be a fascinating research of Tennie, her thoughts and emotions, many achievements, influences, disappointments and successes. Beautifully written and cleverly crafted. On Ageing We started reading 'Tennie's Space' at the chapter portraying 'the Independent Patriarch'. Most of us must have one as excellent as 'Maurice'. We often do not know the road that has been used by our parents and grandparents. Tennie's Space Interesting, timely, well crafted and assists the reader to gain insight in to the plight of these facing end of life issues, and leaves a single with the incentive to respect their wants regarding how and where their care ought to be given. Heather's usage of Tennie to recount the life span and ageing of what are probably her own many and varied close friends is beautifully done well. This book is an excellent read to maybe glimpse our very own future road, using its uncertainties and its joys. It is definitely thought provoking. The writer cleverly creates a tale of interesting characters who are at various stages of passage within their life cycles. We enjoyed the book, specifically the twist at the end and very much recommend. An enjoyable, easy read which I would recommend. Therefore, I could say "so true" what the book relates - it's well noticed and beautifully written. I highly recommend it and buy an extra copy for a pal or loved one! Author Ross also provides us great poetic descriptions of the wonder of the Swiss countryside as Tennie observes the changing periods from her window. Like the window Tennie sits of which displays the lush landscape and the changing seasons, Tennie displays on her life's trip -- her choices, accomplishments, and the dark spots of her emotionally deprived childhood. Tennie's Space A touching and thought-provoking chronicle of events of a global selection of folks from all walks of life, all ultimately facing the challenges of later years. Ross has written a publication that inspires incredible sympathy. "Tennie's Space" An uncommon novel that is clearly a well crafted easy read involving Tennie's observations about her fellow retirees. I highly recommend this publication to readers of all ages, whether young or older, it includes an insightful look at of the globe through the eye of anyone who has enjoyed life's ups and downs. It may provide you with a different and positive outlook on the latter phases of our your daily life rather than

agonizing about it. The subjects of these have been challenging, believed provoking and sometimes frankly worrying, but possess always eloquently and gracefully conveyed. 'Tennie's Space' a reserve not to miss Although I've occasionally read magazine articles on problems faced by older persons and perhaps their families, this is actually the first book I have discovered which truly puts into focus the reality of their situation and deals with their emotions. I was pleasantly surprised to find it a satisfying read in addition to informative. I can thoroughly recommend it So true! Even though characters all live in Switzerland, the problems they face in their later years is usually common to all western cultures. The characters that populate Tennie's world are therefore colourfully described you feel you get to know them. It could make them reflect just a little on their duties vis-a-vis their elderlies rather than thinking about the use of their inheritance to come ... Thought provoking I actually felt quite sad to complete Tennie's Space this morning as Tennie had turn into a type of friend. I know many similar types and am taking/possess taken care of several, those who's descendants either live far away or, worse, just do not care. It creates one pause and consider our individual situations, our loved ones and how exactly we very best map out a fulfilling potential placing a greater value in the elderly and giving them the respect they deserve.
