The Truth About Cancer: What You Need to Know about Cancer's History, Treatment, and Prevention

One out of three ladies alive today, and one out of two men, will face a cancers diagnosis, based on the World Health Corporation. Ty Bollinger will take this personally: in the course of a decade, he says, "I dropped my entire family members to cancer. I don't believe I had to lose them. Bollinger hands listeners with essential, occasionally startling information about: The history and politics of cancer The takeover of medical education by unique interests and forprofit agendas How some life-saving remedies have already been kept from the public - and why Treatment options that go well beyond chemotherapy, radiation, and surgery "To us this is simply not a business, it's a objective," he explains." The book delves into the history of medication - all the way back again to Hippocrates's credo of "do no harm" - as well as up-tothe-minute analysis that proves the efficacy of a large number of advanced cancer treatments being used around the world." The Truth about Malignancy has been written for one simple reason: to share the knowledge we need to protect ourselves, deal with ourselves, and in some cases conserve our lives or the lives of these we love. "We're on a mission to save the world. Bollinger, whose October 2015 documentary miniseries THE REALITY about Cancer: A WORLDWIDE Quest has received more than five million views to date, explains there are many methods we are able to access to deal with and stop cancer - we just don't know about them.
