The second section includes seven interviews the author conducted with different guys she has encountered in her existence. If personal stories inspire you, then the stories of these men are value reading. Essentially, this reserve is divided into two sections. While I'd agree with my fellow reviewers in the publication regarding the value contained in the interviews, I experienced the author's role in lots of of them left a lot to be desired. Far too frequently I felt the writer provided too much detail in what she gives which overshadowed the insights and worth the interviewee had to offer. Five Stars Outstanding book.
