The writer is an incredible story teller and that, in my opinion, is why is this book. A favorite of mine was the starting tale in chapter 15 on permission where we observe Karen's daughter wanting to drop out of university very much to the dismay of her parents.. For this reason book I have changed my habits, I've made a bucket list, and I have began crossing some of these things from my bucket list. The beauty of this tale is usually that the author's daughter after that flew to New York to audition for a Broadway play, which she ended up obtaining and allowed her to begin with the career of her dreams. This chapter on permission illustrates a robust concept that is usually the reason behind many people not really living their dreams and will probably be worth the cost of this book by itself.
